

CATALINA SYDDALL

Fullstack Web Developer at LambdaClass
<https://personalweb.catalinasyddall.now.sh/>

About me

My name is Catalina, I'm a developer at LambdaClass, currently working with Erlang, Elixir, Phoenix and Python. I'm finishing my major in Psychology and started coding for hobby which I found INCREDIBLY fun and grown a huge passion that took me to change to a full time coding job. I've finished a coding bootcamp at Acacia where I've learned React and NodeJS. I also collaborate with Woman Who Code, a female global community that organizes events, meetups and workshops for women in tech.
